1. Open your terminal
2. Type "pip --version" hit Enter
3. If it tells you that you have a version of pip installed, you're good to go!
4. If it says "pip: command not found" continue on with the steps
5. Type "sudo easy_install pip" hit Enter, if prompted for your password type it in and hit Enter
6. Type "pip -- version" hit Enter, you should see that a version of pip is installed.
